

## Summary of Verbal Comments Received during the Public Meeting

<b>Comment / Question</b>
<i>Project / Technology / Infrastructure / Project Location</i>
How deep are collector cables buried underground from turbine and along access road?
Asked if the developer will be around during construction to verify construction crew is actually following design.
What are the risks ("bad elements") of a transformer station?
Inquired about the locations of installed cables in the municipal road allowance.
Concern regarding collector lines in the road allowance being overhead.
Concern regarding turbines potentially being located west of Highway 21.
What are the different types of foundation designs, will pilings be used? If you have to use pilings how will you let the public know?
What is the worst "stuff" in the transformers and how is this being addressed? Will the oil be PCB or have any PCB in it?
When is drilling starting at the substation property?
What turbines will be derated?
Why do substations have gravel?
<i>Project Studies</i>
Questions regarding which studies were completed for the Project and next steps.
Why are European artifacts an issue?
<i>Health and Noise</i>
Concerns regarding noise, stray voltage, and low frequency noises.
What will I hear? What will it sound like? Will I feel low frequency noise (LFN)? Will it affect my dog?
Concerned with changes in sound character.
Requested peer reviewed literature on noise studies.
No infrasound checks?
<i>Wildlife and Natural Environment</i>
What are the impacts of dewatering?
What damage will the underground collector line near my house do to the trees?
Why isn't my land considered a wetland?
Concern regarding waterfowl mortality and avoidance. Question regarding monitoring methods.
Would the drainage become worse than it presently is near the 500 kV substation?
Belief that turbine foundations will require piles to stabilize the structure and concerned about potential dewatering / water quality impacts of having to excavate to a depth of 120 feet.
<i>Socio-economic</i>
Concerns regarding property values and assessed land values.
What is the taxation on wind turbine income?
Requested details about the Community Renewable Energy Benefit and if they qualify for the Benefit.

## Public Meeting Participant Feedback Form Summary

Correspondent	Date Sent/Received	Date Responded	Feedback Form Summary	Project Team Response Summary
138	October 18, 2012	November 2, 2012	<ul style="list-style-type: none"> <li>Advised he has been to many meetings and has always had his concerns dealt with appropriately.</li> <li>Noted he is in favour of the Project.</li> </ul>	<ul style="list-style-type: none"> <li>Thanked correspondent for attending the October 18, 2012 Public Open House.</li> <li>Noted appreciation of his support and participation in the proposed Project.</li> <li>Advised more Project information is available in the provided K2 Wind Fall 2012 newsletter and on the Project website.</li> </ul>
139	October 18, 2012	November 2, 2012	<ul style="list-style-type: none"> <li>Advised he had very good conversations with Project Team representatives.</li> <li>Advised all of his questions were answered regarding number of turbines, distance from his property and stage of development.</li> <li>Inquired what the proposed timeline of the Project is to be approved to proceed.</li> </ul>	<ul style="list-style-type: none"> <li>Thanked correspondent for attending the October 18, 2012 Public Open House.</li> <li>Noted K2 Wind was pleased to hear the correspondent's questions were answered at the Public Open House.</li> <li>Advised the current proposed Project timelines would allow construction to begin in late 2013, with commercial operation anticipated to begin in late 2014. However, final Project timelines will depend on the timing of regulatory approvals.</li> <li>Advised more Project information is available in the provided K2 Wind Fall 2012 newsletter and on the Project website.</li> </ul>
38	October 18, 2012	November 2, 2012	<ul style="list-style-type: none"> <li>Requested information on the specific locations of turbines 276, 274, 277 and 283.</li> <li>Advised he does not want windmills to affect future development on his two farms.</li> <li>Expressed concerns about drainage and waste block up.</li> </ul>	<ul style="list-style-type: none"> <li>Thanked correspondent for attending the October 18, 2012 Public Open House.</li> <li>Included a map showing specific locations of the turbines the attendee requested information on.</li> <li>Noted that the Project's turbine access roads will be at the same grade as the surrounding farmland and will be graveled, to permit water to drain through the road surface and to minimize any changes to existing drainage patterns in the area.</li> <li>Noted K2 Wind would hire a contractor to repair any damages to farm drain tiles resulting from construction work.</li> <li>Noted the Project would not alter the course or capacity of municipal drains.</li> <li>Advised landowners are free to apply for building permits anywhere on their property they wish and that approval of</li> </ul>
